(54) FUEL TANK OF WORKING VEHICLE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a fuel tank of a working vehicle allowing filling of a fuel in a short time by both right and left fuel tanks and capable of preventing leakage of fuel when a traveling machine body tilts at the maximum stable inclination angle.

SOLUTION: The fuel tanks 9 provided on both right and left sides below a step 8 of a driving seat 4 are communicated with each other by a pipe 21 for circulating a fuel, a breather pipe 23 for keeping the pressure in the fuel tanks 9 are erected from the respective fuel tanks 9, and an air vent hole 26 is disposed in a position a little higher than the highest liquid level height of the fuel in the fuel tanks 9 when the traveling machine body 1 is inclined at the maximum stable inclination angle.
